Experiments

Volcano

1. Place the cola bottle on a flat surface.
2. Open the bottle carefully.
3. Drop 3-5 Mentos into the cola.
4. Step back and watch the eruption!

Oobleck

1. Mix 1 cup of water with 2 cups of cornstarch.
2. Stir until it forms a thick paste.
3. Press hard—it feels solid!
4. Let go—it flows like liquid!

Experiments

Self-Inflating Balloon

1. Pour 2-3 tablespoons of vinegar into a bottle.
2. Put 1-2 teaspoons of baking soda into a balloon.
3. Stretch the balloon over the bottle's mouth.
4. Lift the balloon, letting the baking soda fall in—watch it inflate!

Lemon Battery

1. Insert one zinc nail and one copper nail into a lemon.
2. Connect a wire to each nail.
3. Attach the wires to a small LED or buzzer.
4. Watch as the lemon generates electricity!

Fun-Facts

A person's sneeze can travel at a speed of about 100mph.

The earth, the moon, and the sun are around four to five billion years old

We cut down around 27,000 trees every day to make toilet paper.

Octopuses have three hearts.

The oldest living tree in the world is in California and is around 4,843 years old.

The space, all of it, is completely silent because there is no medium or mechanism to allow sound to travel
